

SEMINAR ON FOREIGN EDUCATION

A seminar related to higher education abroad was organized today by the career development cell and student council of manit. The seminar featured the foreign internship programs, master's and PhD programs and the related scholarships, fellowships schemes. The preparation strategies for related exams like GRE, TOEFL were also discussed. Whole procedure right from the beginning of applications to universities to the visa applications is discussed by the institute's alumni Preeti Vyas who graduated from manit itself from Electronics and Communication Engineering. She is having a research background in Robotics and she shared her personal experiences in the field or higher studies. She also shared insights about the interview procedures and pre application mails. The seminar focussed on delivering student the wide horizon of options that can be availed after graduation in the field of research. A thorough question-answer round clarified the doubts of all the participants. As a whole this seminar was an insightful session for the institute's students. The participants comprises of all four years student from B.Tech, B.Arch and planning and also the M.Tech students.
