

INTERNSHIPS

“Empowering students to bear their own expenses by internships”

This year the Training and Placement Cell of MANIT is doing excellent work to provide 2 to 6 month pre-placement and internship opportunities to **pre-final year** students. This has gained a lot of appreciation from the parents of these students which resulted in the students paying for their college semester fees themselves and not relying on their parents for the same. Big MNCs like *Goldman Sachs, Microsoft, Amazon* and many more are willing to pay as much as INR

30,000 per month for interns only to secure these bright students. And these Internships get converted to **Pre-Placement Offers** (PPO) in the final year and helping students to get handsome packages like 30LPA. No. of Internships has increased to **5 times** as compared to last year. All the eminent start-ups which are visiting IITs for pre-placement opportunities are also visiting MANIT for internships. My team has been trying their best to increase this figure to 25 times and trying their best so that each and every student of our institute start earning from their 2nd year itself.

Goldman Sachs, one of the biggest investment banking companies of the US has raised the placement bar for the institute by visiting the campus. This company offers the highest package to a fresher in the country by paying 45 LPA and a posting in London. This has set a new level for the students of the institute. Moreover the Training and Placement Cell has been working day in and day out to create such a record breaking placement session this year.

MANIT, the state's top engineering institute is doing wonders in the placement session of the year 2016-17. Goldman Sachs, Amazon, Axtia, Factset and some reputed core companies as well have visited the Madhya Pradesh state for the first time for Internships. These companies said that the students of the NIT, Bhopal were excellent in their technical and analytical knowledge and that they would do great in which ever field they aspire to follow.

Dr. Aruna Saxena
(Prof & Head, Training and Placement cell)
